

Go GREEN Workshop! WELLFLEET

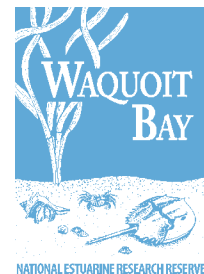

Wellfleet Bay Wildlife Sanctuary,
Massachusetts Audubon, Wellfleet
Wednesday, October 31
9 am -3 pm

FREE

This all-day workshop focuses on energy in the home and small business—both efficiency and renewable energy systems. Several presentations will feature expert speakers from a variety of organizations and companies, and provide take-home information designed to help you improve your quality of life, save money, and help protect the Cape’s natural resources. Topics covered will include an overview of how energy is currently generated and supplied to Cape residents; the benefits of energy efficiency; solar power; and “clean and green” electricity. The day will end with a tour of Wellfleet Bay’s Green Building.

For a schedule of presentation and to register (preferred but not required) call Melissa Lowe, 508-349-2615, or mloew@massaudubon.org
